

Resources and Development (Set B) — MCQ Worksheet

Social Science — Geography • Chapter 1 • 25 Questions, 1 mark each — Total: 25 marks

Instructions: Choose the correct option (A / B / C / D) for each question. Each question carries 1 mark. There is no negative marking. Suggested time: 30 minutes.

Q1. Resources classified on the basis of origin are:

- | | |
|------------------------------|---------------------------------|
| (A) Biotic and abiotic | (B) Renewable and non-renewable |
| (C) Individual and community | (D) Potential and developed |

Q2. Forests, fisheries and livestock are examples of:

- | | |
|----------------------|-----------------------|
| (A) Biotic resources | (B) Abiotic resources |
| (C) Stock resources | (D) Reserve resources |

Q3. Solar energy, wind energy, water are classified as:

- | | |
|-------------------------|-------------------|
| (A) Renewable resources | (B) Non-renewable |
| (C) Biotic | (D) Stock |

Q4. Coal, petroleum and minerals are:

- | | |
|-----------------------------|-------------------|
| (A) Non-renewable resources | (B) Renewable |
| (C) Biotic | (D) Inexhaustible |

Q5. Public parks, picnic spots, playgrounds are:

- | | |
|-------------------------------|--------------------------|
| (A) Community-owned resources | (B) Individual resources |
| (C) National resources | (D) International |

Q6. All minerals, water resources, forests and wildlife within the political boundary of a country are:

- | | |
|------------------------|-------------------|
| (A) National resources | (B) International |
| (C) Private | (D) Community |

Q7. Resources beyond 200 nautical miles of EEZ in oceans are:

- | | |
|-----------------------------|--------------|
| (A) International resources | (B) National |
| (C) Private | (D) Stock |

Q8. The first International Earth Summit was held in 1992 at:

- | | |
|--------------------|---------------|
| (A) Rio de Janeiro | (B) Stockholm |
| (C) Geneva | (D) New York |

Q9. Agenda 21 was adopted at:

- | | |
|---------------------------|-------------------------|
| (A) Rio Earth Summit 1992 | (B) Kyoto Protocol 1997 |
| (C) Paris 2015 | (D) Montreal 1987 |

Q10. Alluvial soil is most common in:

- | | |
|------------------------------|--------------------|
| (A) Northern plains of India | (B) Deccan plateau |
| (C) Western ghats | (D) Rajasthan |

Q11. Black soil is ideal for growing:

- | | |
|------------|-------------|
| (A) Cotton | (B) Rice |
| (C) Tea | (D) Coconut |

Q12. Red and yellow soil develops on:

- | | |
|---|----------------------|
| (A) Crystalline igneous rocks in low-rainfall areas | (B) Sand dunes |
| (C) Black basaltic rocks | (D) Glacial deposits |

Q13. Laterite soil is found in:

- | | |
|---|--------------------|
| (A) Heavy rainfall and high-temperature areas | (B) Cold desert |
| (C) Dry deserts | (D) Mountain peaks |

Q14. Bangar soil is:

- | | |
|--|----------------------|
| (A) Older alluvium with higher concentration of kanker nodules | (B) Younger alluvium |
| (C) Sandy desert soil | (D) Mountain soil |

Q15. Soil erosion can be controlled by:

- (A) Afforestation, terrace farming, contour ploughing
- (B) Deforestation
- (C) Mining
- (D) Overgrazing

Q16. The most widespread relief feature in India is:

- (A) Plains formed by alluvial soil deposits
- (B) Mountains
- (C) Deserts
- (D) Plateaus

Q17. Khadar soil differs from Bangar in:

- (A) It is younger, more fertile, deposited annually by floods
- (B) It is older and less fertile
- (C) It is desertic
- (D) It is black

Q18. Which of these is NOT a cause of soil degradation in India?

- (A) Afforestation
- (B) Deforestation
- (C) Overgrazing
- (D) Over-irrigation

Q19. Resources that depend on technology, economy and acceptance for development are called:

- (A) Developable resources
- (B) Stock resources
- (C) Renewable
- (D) Biotic

Q20. Resources surveyed but yet to be used are called:

- (A) Reserves
- (B) Stock
- (C) Potential
- (D) International

Q21. Brundtland Commission report 'Our Common Future' (1987) emphasised:

- (A) Sustainable development
- (B) Free trade
- (C) Industrial growth
- (D) Population reduction

Q22. Contour ploughing means:

- (A) Ploughing along the contours of slopes
- (B) Ploughing in straight lines
- (C) Deep ploughing
- (D) Cross-ploughing

Q23. Shelter belts of trees are particularly useful in:

- (A) Reducing wind erosion in arid and semi-arid areas
- (B) Generating electricity
- (C) Mining
- (D) Fishing

Q24. Laterite soil's name comes from the Latin word 'later' meaning:

- (A) Brick
- (B) Iron
- (C) Red
- (D) Rock

Q25. Arid soil is rich in ____ and lacks ____ :

- (A) Salt; humus and moisture
- (B) Humus; salt
- (C) Iron; calcium
- (D) Water; air
