

Answer Key & Marking Scheme

Subject: Social Science | **Test:** Test 2 (Day 14, 23 May 2026) — 2-Week Cumulative
Maximum Marks: 80

Syllabus: History Chs 1–2 (Nationalism in Europe; Nationalism in India) • Geography Chs 1–2 (Resources & Development; Forest & Wildlife Resources) • Civics Ch 1 (Power-sharing) • Economics Ch 1 (Development)

SECTION A — Answer Key (1 mark each)

- Q1.** (a) Metternich.
Q2. (b) France.
Q3. (b) France and Germany.
Q4. (b) 1919.
Q5. (a) 13 April 1919.
Q6. (a) February 1922.
Q7. (a) Sabarmati to Dandi.
Q8. (c) afforestation and contour ploughing.
Q9. (b) Asiatic elephant.
Q10. (b) Kaziranga.
Q11. (a) forests under direct government control for timber.
Q12. (a) protected by faith of local people.
Q13. (c) Concentration in one organ.
Q14. (b) Total income / population.
Q15. (b) low, middle and high income.
Q16. (c) Human Development Index.
Q17. Sustainable development is development that meets present needs without compromising the ability of future generations to meet their own needs.
Q18. 'Satyagraha' literally means 'pursuit of truth' — a method of non-violent resistance to injustice based on truth and moral force, popularised by Gandhiji.
Q19. Human Development Index.
Q20. India / USA / Belgium / Canada / Australia (any one).

SECTION B — Answer Key (2 marks each)

- Q21.** The Treaty of Vienna 1815 was signed by European powers (Austria, Prussia, Russia, Britain) after Napoleon's defeat. Provisions: (i) Bourbon dynasty restored in France. (ii) Many territorial changes — establishment of buffer states; German confederation of 39 states retained; Russia got part of Poland; Prussia got new territory on western frontiers. (2)
- Q22.** Gandhi withdrew the movement after the violent Chauri-Chaura incident (February 1922) where a mob burnt a police station, killing 22 policemen. Gandhi was deeply disturbed by this violence which went against his principle of non-violence. (2)
- Q23.** Alluvial soils are deposited by rivers, found mainly in northern plains, very fertile, rich in potash and lime. Red soils develop on crystalline igneous rocks in low-rainfall areas of the Deccan; reddish in colour due to iron oxides; less fertile but suitable for millets, groundnut. (2)
- Q24.** (i) *Prudential reasons*: reduces social conflict, ensures political stability. (ii) *Moral reasons*: the spirit of democracy demands sharing power with all those affected by it; making power-sharing legitimate. (2)
- Q25.** Per capita income hides inequalities. For example, two countries A and B may have the same per capita income, but if income in A is unequally distributed, most people in A may be poor while in B income may be evenly distributed. Hence comparing only per capita income masks inequality and quality of life differences. (2)

SECTION C — Answer Key (3 marks each)

Q26. Mazzini was an Italian revolutionary who believed that nations were natural units of mankind and should each have their own state. He founded two secret societies — Young Italy in Marseilles (1830) and Young Europe in Berne — for the political emancipation of Italy. He inspired the spread of revolutionary nationalist movements in many parts of Europe. Although Italy's unification was finally achieved by Cavour and Garibaldi under the Sardinia-Piedmont monarchy (1859–61), Mazzini's ideas of a unitary Italian Republic provided the ideological foundation. (3)

Q27. The First World War led to a huge increase in defence expenditure, financed by war loans and increased taxes. Customs duties and income tax were raised, prices doubled between 1913 and 1918, leading to extreme hardship for the common people. Forced recruitment in rural areas caused widespread anger. Crop failures (1918–19, 1920–21) and influenza epidemic killed millions. People hoped for relief but instead experienced more misery — these conditions provided fertile ground for nationalist movements. (3)

Q28. (i) Establish national parks, sanctuaries and biosphere reserves. (ii) Special projects like Project Tiger, Project Elephant. (iii) Strict implementation of the Wildlife (Protection) Act 1972 and ban on hunting/poaching. (Also: involve local communities; control deforestation; awareness programmes.) (3)

Q29. Belgium accommodated diversity through power-sharing — equal Dutch- and French-speaking ministers in central government; community government with cultural and educational powers; special arrangement for Brussels (50/50). Sri Lanka pursued a majoritarian approach — Sinhala-only Act 1956, preference for Sinhalese in jobs, Buddhism made the official religion. Belgium has unity and peace; Sri Lanka faced a long civil war. The contrast shows that accommodation works better than majoritarianism. (3)

SECTION D — Answer Key (5 marks each)

Q30. European nationalism in the early 19th century grew due to several factors. **Social:** rise of the middle class — educated, propertied, and exposed to ideas of national unity. **Political:** French Revolution (1789) gave the modern ideas of nation, citizenship, sovereignty; Napoleon's reforms (1804 Code) abolished feudalism, ensured equality before law, freed peasants. **Cultural:** Romanticism celebrated emotion, folk tales (Grimm Brothers), folk songs (Herder), national language and shared history. **Economic:** the customs union 'Zollverein' (1834) reduced tariffs and built a sense of economic union among German states. **Revolutions of 1830 and 1848** spread these ideas widely. Together these forces transformed Europe from a continent of dynastic states to one of nation-states. (5)

Q31. Civil Disobedience Movement was launched on 12 March 1930 with the Salt March from Sabarmati to Dandi. **Stages:** (i) Salt March and breaking the salt law (April 1930). (ii) Spread to industrial workers, peasants, women across India. (iii) Government repression — arrests, lathi charges; Gandhi-Irwin Pact (March 1931); Second Round Table Conference; movement re-launched after its failure; finally called off in 1934. **Participants:** peasants resisted revenue collection (Surat in Gujarat, North-West Frontier Province); industrialists like G.D. Birla supported the movement, refused to buy imported goods; women from urban families participated in picketing liquor and foreign cloth shops, marched and went to jail; tribals and Dalits contributed too, though some leaders like Ambedkar criticised Congress's stance on Dalit issues. (5)

Q32. Land-related problems: (i) **Soil erosion** due to deforestation and overgrazing. (ii) **Land degradation** due to over-irrigation (waterlogging, salinity), excessive use of chemicals, and mining. (iii) **Decreasing forest cover.** (iv) **Pressure of population** reducing per capita land. **Measures:** (i) Afforestation and shelter belts. (ii) Contour ploughing on slopes; terrace farming. (iii) Regulating mining and proper rehabilitation of mined areas. (iv) Promoting organic farming and judicious use of fertilisers; control of grazing. (5)

Q33. Different people have different aspirations: a farmer wants assured irrigation and fair prices; a wage worker wants secure employment; a girl in a rich family wants freedom; a young person wants modern educational opportunities. Sometimes development goals conflict — a dam may benefit some farmers but displace others. **UNDP criteria:** Human Development Index, which measures: (i) per capita income (PPP), (ii) life expectancy at birth, (iii) education (mean years of schooling and expected years). HDI thus captures the multi-dimensional nature of development beyond just income, and reflects the diverse goals of human beings. (5)

SECTION E — Answer Key (4 marks each)

Q34. (i) An Italian revolutionary who founded Young Italy and inspired Italian nationalism. (1) (ii) The aim of Young Italy was the political emancipation of Italy and the formation of a unified, republican Italian nation. (1) (iii) His relentless opposition to monarchy and his vision of democratic republics frightened conservatives, who saw him as a threat to the old order based on hereditary monarchy and aristocratic privilege; Metternich described him as 'the most dangerous enemy of our social order'. (2)

Q35. (i) Biodiversity is the variety of life forms — plants, animals, microorganisms — and their interactions in a given area. (1) (ii) Any two of: deforestation for cultivation, mining, building dams/highways, urbanisation, forest fires. (1) (iii) Forests provide oxygen, regulate climate, prevent soil erosion, supply timber, fodder, fuel, medicines, and food. They also support tribal livelihoods and tourism. (2)

Q36. (i) Total income depends on population — a country with large total income but huge population may still be poor on average. Per capita allows fairer comparison. (1) (ii) (a) It hides inequalities — average income may be high but distribution may be unequal. (b) It does not capture other dimensions like health, education, environment. (2) (iii) Human Development Index (HDI) of UNDP. (1)
