

Water Resources (Set B) — MCQ Worksheet

Social Science — Geography • Chapter 3 • 25 Questions, 1 mark each — Total: 25 marks

Instructions: Choose the correct option (A / B / C / D) for each question. Each question carries 1 mark. There is no negative marking. Suggested time: 30 minutes.

Q1. Total fresh water (less than 3%) is the major source of:

- (A) Drinking, agriculture, domestic and industrial use
- (B) Salt extraction
- (C) Tides
- (D) Oceans

Q2. Hydrological cycle is:

- (A) Continuous movement of water by evaporation, condensation, precipitation, runoff
- (B) Movement of ocean currents only
- (C) Rotation of earth
- (D) Carbon cycle

Q3. Three-quarters of Earth's water is:

- (A) Salt water in oceans
- (B) Fresh water
- (C) Glaciers
- (D) Underground

Q4. Water scarcity is caused by:

- (A) Overuse, pollution, unequal access, poor management
- (B) Heavy rainfall
- (C) Few people
- (D) Forests

Q5. Most multi-purpose river projects in India were initiated:

- (A) After Independence as 'temples of modern India'
- (B) Before Independence
- (C) Only in 21st century
- (D) Never built

Q6. Bhakra Nangal project is on:

- (A) Sutlej river
- (B) Mahanadi
- (C) Krishna
- (D) Cauvery

Q7. Hirakud Dam is on:

- (A) Mahanadi
- (B) Krishna
- (C) Cauvery
- (D) Tapti

Q8. Damodar Valley Corporation operates on:

- (A) Damodar river
- (B) Krishna
- (C) Yamuna
- (D) Brahmaputra

Q9. Sardar Sarovar project is on:

- (A) Narmada
- (B) Mahanadi
- (C) Sutlej
- (D) Tapti

Q10. Narmada Bachao Andolan was a movement against:

- (A) Sardar Sarovar Dam and large dam projects
- (B) Mining
- (C) Forest cutting
- (D) Pollution

Q11. Rainwater harvesting in Rajasthan involves:

- (A) Tankas (underground tanks) for drinking water
- (B) Floating tanks
- (C) Marine tanks
- (D) Plastic tanks only

Q12. Bamboo drip irrigation is traditional to:

- (A) Meghalaya
- (B) Rajasthan
- (C) Punjab
- (D) Kerala

Q13. Johads, khadins are systems of:

- (A) Water harvesting in Rajasthan/Gujarat
- (B) River navigation
- (C) Power generation
- (D) Forest farming

Q14. Kuls/guls are:

- (A) Diversion channels carrying water from glacier streams in Himachal Pradesh and Jammu
- (B) Wells

(C) Tubes

(D) Tank reservoirs

Q15. Tamil Nadu was the first state to make rainwater harvesting mandatory in:

(A) All buildings, 2003 onwards

(B) Only public buildings

(C) Only farms

(D) Only schools

Q16. A negative impact of large dams is:

(A) Displacement of people, ecological imbalance, sediment trapping

(B) Increased water supply only

(C) Cheaper electricity

(D) More jobs

Q17. Inundation channels for irrigation are common in:

(A) West Bengal floodplains

(B) Rajasthan deserts

(C) Kashmir valleys

(D) Karnataka plateaus

Q18. Watershed management means:

(A) Integrated management of surface and groundwater within a basin

(B) Building large dams only

(C) Selling water

(D) Privatising rivers

Q19. Roof-top rainwater harvesting helps mainly by:

(A) Recharging groundwater and providing direct storage

(B) Generating electricity

(C) Cooling buildings

(D) Decoration

Q20. Why are inter-state water disputes common in India?

(A) Major rivers flow through several states; sharing needs negotiation

(B) Rivers don't exist

(C) Centre controls all rivers

(D) States have no powers

Q21. Gendathur in Karnataka is known for:

(A) Model rainwater harvesting village

(B) Industrial pollution

(C) Mining

(D) Floods

Q22. Excessive irrigation causes:

(A) Salinisation of soil and waterlogging

(B) Better crops always

(C) More rain

(D) Forest growth

Q23. Why do migratory fish suffer when dams are built?

(A) Dams block their natural upstream migration for breeding

(B) Water becomes cold

(C) Fish don't migrate

(D) Fishermen catch them

Q24. Krishna–Godavari water dispute mainly involves:

(A) States of south India sharing waters of these rivers

(B) Punjab and Haryana

(C) Bihar and Bengal

(D) Maharashtra and Gujarat only

Q25. Per capita availability of water is declining in India because:

(A) Rising population, urbanisation, overuse and pollution

(B) Reduction in rainfall only

(C) Better management

(D) Fewer rivers
