

Minerals and Energy Resources (Set B) — MCQ Worksheet

Social Science — Geography • Chapter 5 • 25 Questions, 1 mark each — Total: 25 marks

Instructions: Choose the correct option (A / B / C / D) for each question. Each question carries 1 mark. There is no negative marking. Suggested time: 30 minutes.

Q1. A naturally occurring substance with definite chemical and physical properties is a:

- (A) Mineral
- (B) Rock
- (C) Soil
- (D) Salt

Q2. Iron ore and manganese are examples of:

- (A) Ferrous metallic minerals
- (B) Non-ferrous
- (C) Non-metallic
- (D) Energy

Q3. Copper, bauxite and zinc are examples of:

- (A) Non-ferrous metallic minerals
- (B) Ferrous
- (C) Non-metallic
- (D) Energy minerals

Q4. Mica, gypsum, limestone are:

- (A) Non-metallic minerals
- (B) Metallic
- (C) Energy
- (D) Liquid minerals

Q5. Coal, petroleum, natural gas are:

- (A) Energy/fossil fuels
- (B) Metallic minerals
- (C) Non-metallic minerals
- (D) Renewable

Q6. Bailadila iron ore mines are in:

- (A) Chhattisgarh
- (B) Karnataka
- (C) Jharkhand
- (D) Odisha

Q7. Khetri copper belt is in:

- (A) Rajasthan
- (B) Karnataka
- (C) Jharkhand
- (D) Odisha

Q8. Panchpatmali bauxite mines are in:

- (A) Odisha
- (B) Andhra Pradesh
- (C) Karnataka
- (D) Maharashtra

Q9. Major coalfields of India include:

- (A) Jharia, Raniganj, Bokaro
- (B) Mumbai High
- (C) Digboi
- (D) Krishna-Godavari basin

Q10. Type of coal with highest carbon content:

- (A) Anthracite
- (B) Bituminous
- (C) Lignite
- (D) Peat

Q11. Digboi oilfield is located in:

- (A) Assam
- (B) Gujarat
- (C) Maharashtra
- (D) Rajasthan

Q12. Mumbai High is famous for:

- (A) Petroleum (offshore)
- (B) Coal
- (C) Iron ore
- (D) Diamond

Q13. Solar energy is most abundant in:

- (A) Rajasthan (Thar desert)
- (B) Sikkim
- (C) Kerala
- (D) Mizoram

Q14. The largest wind energy farm in India is in:

- (A) Tamil Nadu (near Kanyakumari)
- (B) Punjab
- (C) Bihar
- (D) Delhi

Q15. Biogas plants use:

- (A) Cattle dung and plant waste
- (C) Petroleum

- (B) Coal
- (D) Solar

Q16. Geothermal energy is harnessed in India at:

- (A) Manikaran (HP) and Puga Valley (Ladakh)
- (C) Patna

- (B) Trivandrum
- (D) Mumbai

Q17. Tidal energy is generated in the:

- (A) Gulf of Khambhat, Kandla and Sundarbans
- (C) Plateaus

- (B) Himalayas
- (D) Deserts

Q18. Uranium and thorium for nuclear power are mined in:

- (A) Jharkhand, Rajasthan, Kerala (monazite sands)
- (C) Gujarat

- (B) Punjab
- (D) Tamil Nadu only

Q19. Why is conservation of minerals essential?

- (A) They are non-renewable and take millions of years to form
- (C) Available everywhere equally

- (B) Easy to make
- (D) Renewable

Q20. Veins and lodes of minerals are found:

- (A) In cracks, crevices and joints in igneous and metamorphic rocks
- (C) In water always

- (B) Loose in sand
- (D) In soil only

Q21. Placer deposits occur:

- (A) In sands of valley floors and base of hills (e.g. gold, platinum, tin)
- (C) In space

- (B) In oceans only
- (D) In tree roots

Q22. Why are renewable energy sources called 'sustainable'?

- (A) They naturally replenish and don't deplete
- (C) They are unlimited resources of fossil fuel

- (B) They are cheap
- (D) They are foreign

Q23. An advantage of nuclear power is:

- (A) Large energy from small fuel; low CO₂ emissions
- (C) No radiation risk

- (B) Easy disposal of waste
- (D) No cost

Q24. An adverse impact of mining on environment includes:

- (A) Land degradation, pollution, deforestation, health hazards to miners
- (C) Cleaner air

- (B) Better forests
- (D) Increased water

Q25. India is the largest producer of which mineral in the world?

- (A) Sheet mica (historically)
- (C) Gold

- (B) Petroleum
- (D) Iron ore globally largest
